

STORY BUILDER — MOBILE UX v3

Product promise

Turn one idea into a living story you can shape, reframe, version, and transform — without needing to know screenwriting or novel theory.

Core Story Model

Each Timeline Version contains:

Opening Frame (optional)

→ 12 Story Beats

→ Closing Frame (optional)

12 Story Beats

1. Where We Begin
2. What They Want
3. The World Around Them
4. Something Goes Wrong
5. A Hard Choice
6. Crossing the Line
7. Things Get Messy
8. A Truth Is Revealed
9. Everything Starts to Fall Apart

10. The Lowest Point

11. Becoming Someone New

12. How It All Ends

Frames sit outside the 12-beat journey.

They shape how the audience enters and leaves the story.

SCREEN FLOW

Screen 1 — Start Your Story

Goal: Get the idea out of the user's head with zero friction.

- Big text field (full screen)
- Rotating example placeholders
- Floating microphone for voice input
- Button: Continue (inactive until at least one sentence)

Creates a Story in Draft state.

Screen 2 — Format

Header: What kind of story is this?

Subtext: You can change this later.

Large 2-column cards:

- Film
- TV
- Book
- Comic
- Play
- Short
- Vertical

Link: Not sure? We'll pick for you.

Button: Continue

Screen 3 — Genre

Header: What kind of story is this?

Segmented toggle:

- I'll choose
- You choose

If “I'll choose”

Large tappable genre chips (multi-select)

If “You choose”

Optional vibe hints + ✨ Surprise Me

Button: Continue

Screen 4 — Tone

Header: How should this story feel?

Floating, emotional chips (multi-select):

Humorous, Dark, Hopeful, Gothic, Romantic, etc.

- Add your own

Button: Build my story

This generates the first 12-beat timeline.

SCREEN 5 — THE STORY TIMELINE

This is the product.

Top:

- Story Title (editable)
 - Format • Genres • Tone
 - Buttons: ✨ Surprise Me, ↺ Regenerate All
-

Timeline Stack

Opening Frame (optional)

If none:

- ✚ Add an opening (Prologue, Cold Open, Flash Forward...)

If present:

- Displays as a special card
- Editable, Regeneratable, Clearable, Lockable

12 Story Beats

Displayed as vertical story cards:

- Beat name
- Beat title
- Story paragraph

Tap to expand:

- ✎ Edit
- ↺ Regenerate
- 🧹 Clear ("We'll come back to that")
- 🔒 Lock

Locked beats cannot be changed by AI actions.

Closing Frame (optional)

If none:

- + Add an ending (Epilogue, Journey Back, Final Image...)

If present:

- Same behavior as Opening Frame

Global Timeline Behavior

Regenerate All

- Rebuilds all unlocked beats & frames

Surprise Me

- Remixes all unlocked beats
- May add, remove, or swap framing (unless locked)

Locked content is always respected.

Approval

Button: Approve Timeline

Confirmation:

Save this as your first draft?

On approve:

- Saves as First Draft Timeline
 - Added to Library
-

Screen 6 — Expand Your Story

Guided questions (1 per screen, skippable):

- Protagonist
- Want / Need
- World
- Antagonist
- Secondary characters
- Turning point
- Ending vibe

Button: Build Updated Timeline

Screen 7 — Updated Timeline

Same Timeline UI.

Button:

- Approve Final Timeline

Saves a new version: Final Timeline

Screen 8 — What Next?

Shows:

Working from: Final Timeline

Buttons:

- Refine
 - Pitch
 - Transform
-

REFINE

Creates a new version every time.

Options:

- Tighten plot
- Add twists
- Alternate ending
- Improve antagonist
- Tone shift
- Story Framing

Story Framing

Two pickers:

Opening Frame

- None
- Prologue
- Cold Open
- Flash Forward
- In Media Res
- Myth / Legend

Closing Frame

- None
- Epilogue
- Journey Back
- One Year Later
- Final Image
- Twist Ending

Button: Apply Framing

Creates a new Timeline Version with frames added/changed.

PITCH

User selects:

- Logline
- Short synopsis
- One-page synopsis
- Numbered outline

Button: Generate Pitch

Saved as a Pitch Package tied to the current Timeline Version.

TRANSFORM

Text:

This creates a new version. Your original stays intact.

Choose new format.

Toggles:

- Keep characters & names
- Keep plot beats
- Keep tone & genre

Framing:

- Keep Opening
- Choose new
- Keep Ending
- Choose new

Button: Transform

Creates a new Timeline Version and sends user to Expand Your Story.

LIBRARY

Each Story contains:

- Timeline Versions (First Draft, Final, Framed, TV Version, etc.)
- Pitch Packages

Users can:

- Open any version
- Rename
- Delete drafts
- See format + framing per version
